Millions of years ago, incredible forces ripped apart the Earth's crust, creating seven extraordinary continents. Seven Worlds, One Planet, presented by David Attenborough, reveals how each distinct continent has shaped the unique animal life found there.

S1 E1 – Antarctica 52 min

Antarctica is a land of survivors enduring the most hostile conditions on Earth. Despite the fact that 98% of the mainland is covered in ice, species from krill and penguins to elephant seals and fin whales have flourished and diversified.

S1 E2 – Asia 49 min

Asia is the largest and most extreme continent on our planet, stretching from the Arctic Circle in the north to the tropical forests on the equator. The animals here face the hottest deserts, tallest jungles and highest mountains found anywhere on Earth.

Roy Lichtenstein

In Southampton, Roy Lichtenstein works on an elaborate, 4-canvas composition called "The Artist's Studio". In conversation with Lichtenstein, critic Lawrence Alloway places Pop Art on a continuum of 20th century art that includes collage, Dada, and Purism in referring to signs and objects of contemporary society. Lichtenstein argues for distinctions between himself, Warhol, Oldenburg, and others.
